## Principles & Criteria review

### INTRODUCTION

In line with ISEAL best practices, that the standards remain relevant and reflect stakeholder understanding of good sustainability practices, the RSPO P&C 2013 will be completely reviewed again and subsequently submitted for ratification by the General Assembly of RSPO by November 2018.

Prior to the revision in 2018, any changes to the standard must be through recommendation made by the appointed RSPO Taskforce (as below) and approved by the General Assembly of the RSPO. Should you have queries on the matter, please send it through our askRSPO system and we will revert to you as soon as possible.
